

HEAVY-DUTY FR BUBBLE CORE BOARD

Our heavy-duty Bubble Core Board is a high-density PP sheet for temporary protection of floors, walls, and other high-value surfaces on construction sites. The proprietary honeycomb bubble structure is designed for high compression strength and impact resistance in a lightweight sheet that is easy to carry and install. The top side of the board is textured for slip resistance. The sheets are fire-resistant and waterproof. Available with fabric backing on one side for added protection.

- Ideal for protection from forklift traffic and heavy wheeled carts
- Fire resistant (ASTM E648 Class 1)
- Water resistant
- Slip-resistant textured walking surface
- Lightweight sheets for easy installation
- Durable and reusable
